IOPS(K)

skip_list
cuckoo

The chart is a grouped bar plot with 'Threads' on the x-axis and 'IOPS(K)' on the y-axis. The x-axis has five categories: 1, 2, 4, 8, and 16. For each category, there are two bars: a solid pink bar for 'skip_list' and a blue hatched bar for 'cuckoo'. The 'skip_list' bars show a slight decrease in IOPS as the number of threads increases, starting at approximately 180 K for 1 thread and ending at approximately 140 K for 16 threads. The 'cuckoo' bars show a sharp increase from 1 to 4 threads, reaching a peak of approximately 320 K, and then remain relatively stable at that level for 8 and 16 threads.

Threads	skip_list (K)	cuckoo (K)
1	~180	~280
2	~170	~220
4	~170	~320
8	~160	~320
16	~140	~320
